

New features for Universal Rectifiers

Universal Rectifiers has incorporated a QR Code for rectifier parts list.

Each rectifier manufactured will have (2) QR Codes.

1) Rectifier Parts list – This list will contain the standard parts used to manufacture each rectifier.

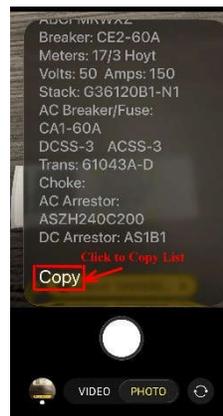

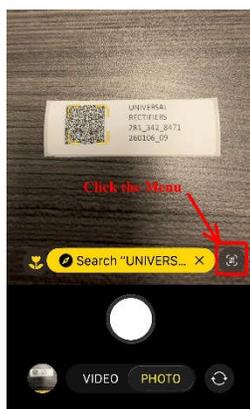

A) Rectifier Type:	B) AC Secondary Breaker:
C) Serial Number:	D) AC/DC Surge arrestors:
E) Main ON/OFF Breaker:	F) Transformer:
G) Meters: DC Volt & DC Amp	H) Filter Choke:
I) Rectifier Stack:	J) AC/DC Lightning Arrestors:

2) Rectifier Stack parts list – This list will contain the standard parts used to manufacture each stack.

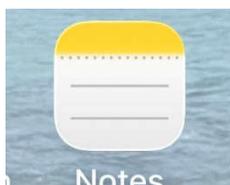

A) Stack Type:	B) Rod / Angle Length:
C) Diode / SCR Diode / Blocking diode Part No:	D) For Replacement Stacks – Surge Arrestors, AC Secondary Breaker.

To get a parts list, follow these steps.

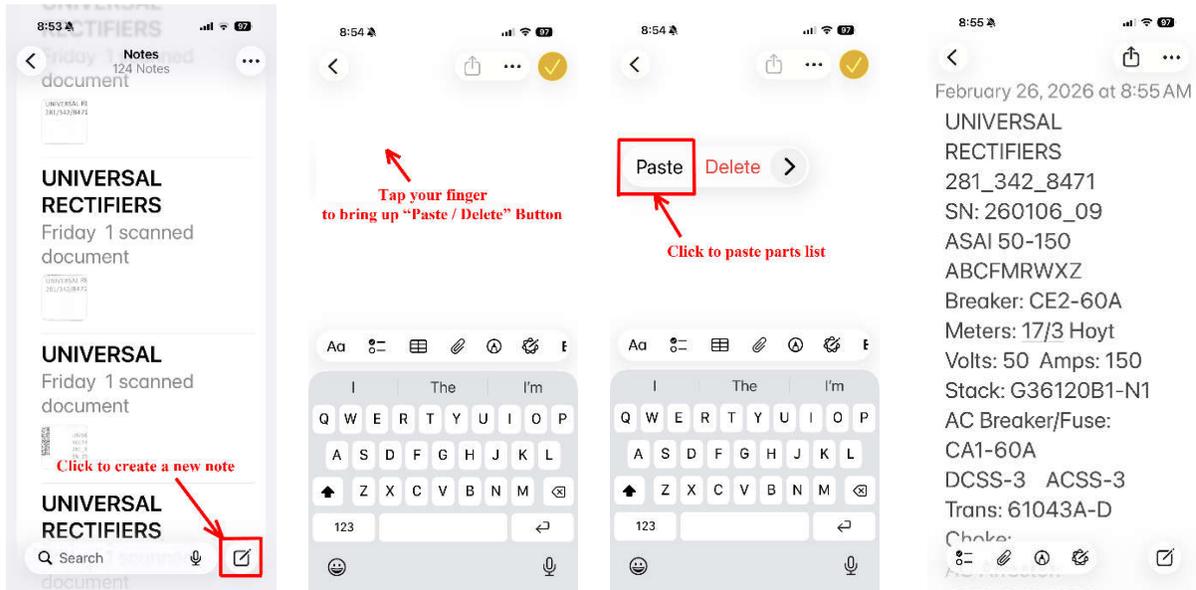

- 1) Open the camera on iPhone or Android.
- 2) Hover over the QR Code until the yellow brackets appear. Click the “MENU” button next to the “yellow search bar”. The parts list will appear. Click on the “COPY” button. (Information is now stored in memory)

3) Open Notes App:

When the Notes app is open click on the Open “NEW NOTES BUTTON” at the bottom right.
In the new Notes page, tap anywhere in the text space and the “PASTE / DELETE” option will appear.
Click on the “PASTE” button and then click on the “CHECK” button in the upper right.
You have now copied and saved the Rectifier parts list to your Note App.

The rectifier parts list is now saved to your phone. If you should have any questions, please contact Universal Rectifiers 281-342-8471.
